

October 2024,

To Whom It May Concern:

Business Referral: Solar Energy Consulting Ltd. (SEC)

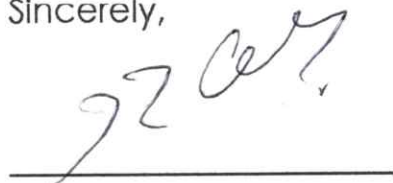

Chemica Limited recently sought the services of SEC to install a solar power system to our Taraka Lae head office building. 160 panels, 50kW inverter with a 69kW array.

Throughout all aspects of the project from review and consultation, through to installation and commissioning - Mr. James Fountain from SEC has been at all times a detailed and extremely knowledgeable individual, guiding us through all aspects of the development.

After several months of the system working without fault and the resulting significant savings in power usage – I have no hesitation in recommending James and SEC to other individuals or businesses looking to cut their electricity costs by installing a solar system.

Please do not hesitate to contact the undersigned if you have any questions regards Chemica's journey installing a solar system in partnership with James and NEC.

Sincerely,

Mr. George Leahy

Chief Executive Officer
